

MG Trophy Championship

Engine Sealing. All classes TR 6.7/7.7/8.7

Before racing for the first time please make sure that you approach our MSA scrutineer who will fit seals to your engine in either of the two locations shown below.

If, for any reason, you need to break these seals you MUST receive permission from the scrutineer or co-ordinator BEFORE doing so.

You MUST have a good reason to break either of the seals and the original seal MUST be retained and shown to the scrutineer who will fit a new seal at the earliest opportunity.

You CANNOT race with a seal missing.
